UNITED REVERSE SYSTEM

Declaration of Originality and Economic Invention

Title:

The Value of Money, Currency, and Assets Backed by the People

A Value System Based on Labor and Productivity through Contribution and Economic Output

Abstract:

This declaration establishes the foundational authorship and originality of the world's first productivity-backed, people-powered currency system. This system, known as the United Reverse System (URS), redefines the origin, allocation, and purpose of money-shifting it from debt-based issuance to value created through human productivity, labor, contribution, and real economic output.

Core Innovations Claimed:

1. Productivity-Backed Currency (URCoin)

All value is created through measurable contributions to society. No money is created unless earned through real labor or economic output.

2. Debt-Free Currency Creation

URCoins are minted directly from verified productivity, not through credit issuance or institutional debt.

3. Mirrored Allocation Engine

Each transaction simultaneously funds public services (healthcare, education, infrastructure, etc.) without taxation, by creating mirrored URCoins proportionate to the wage earned.

4. AI-Powered Governance and Distribution Bots

All economic flows, payrolls, and public funding allocations are handled by autonomous, ethical AI bots, governed transparently.

5. Self-Balancing Closed Economic Loop

Inflation and deflation are automatically regulated by the system's built-in productivity tracking and burn logic-maintaining purchasing power and preventing manipulation.

Date of Declaration:

June 17, 2025

Inventor:

Edward Martin Hernandez

Creator and original architect of the United Reverse System (URS)

Declaration Statement:

I, Edward Martin Hernandez, do hereby formally declare that I am the original inventor of the world's first productivity-backed currency and economic system as outlined above. This invention represents a fundamental evolution of money and value, designed to serve the people, eliminate financial manipulation, and ensure prosperity through contribution. All rights, definitions, structures, and functions herein are hereby claimed as my intellectual and sovereign economic invention.
